U. S. Patent and Trademark Office PTO-326 (Rev. 3-97)

\*U.S. GPO: 1997-417-381/62710

Part of Paper No.

Application/Control Number: 09/945,199 Page 2

Art Unit: 2645

Claims 1- 56 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claim 1 is vague and indefinite because in line 2, applicant claims that a call has been established. Then in lines 3-6 applicant claims that the writing surface mode4 change condition establishes the call. how can the writing mode change condition establish a call if the call has already been established, as previously claimed in line 3? Applicant has basis the spec for a control unit 32 that can toggle between a display screen and a writing surface. The spec is also deficient because on page 4, lines 1-2. applicant discloses that the writing surface change condition establishes the call. Applicant has basis in the spec on page 7 for "...upon establishment of a call...the control unit 32 causes the screen 26 to automatically enter into the writing-surface mode so the that the user of the mobile station 10 can easily write notes during the call without having to operate a menu or other navigation system." "[Alternatively], "the control unit 32 does not cause the device 14 to enter into the writing surface mode until button 28 of the device is pressed. Therefore, to claim that the writing mode change condition establishes a call" seems inaccurate because the control unit will allow the user to switch from a display screen to a writing surface/ screen by depressing the control unit's button for such purpose, AFTER the call has been established.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

## Best Available Copy

Art Unit: 2645

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1- 56 as understood are rejected under 35 U.S.C. 102(e) as being anticipated by de Casillas, Linge, or Shin et al.

Al three references teach applicant's concept of utilizing a writing surface in conjunction with a mobile phone.

Any inquiry concerning this communication should be directed to Creighton h

Smith at telephone number 308-2488.
